Always turn water supply OFF before removing existing faucet or disassembling the valve. Open faucet handle to relieve water pressure and ensure that complete water shut-off has been accomplished.

Toujours couper l'alimentation en eau avant de retirer ou de démonter le robinet. Ouvrir le robinet pour libérer la pression d'eau et pour s'assurer que l'alimentation en eau a bien été coupée.

Siempre CIERRE la toma de agua antes de quitar la llave existente o desmontar la válvula. Abra la llave para liberar la presión, y asegúrese de que esté bien cerrada el agua.
